A new variety of **Charleston pepper**, suitable for **winter** greenhouse **growing**, consisting of healthy, vigorous plants with a good range of resistance. The fruits are of excellent quality, with an **attractive green colour** and **no anthocyanins**.

GENETIC RESISTANCES

HR: TM2

A variety of **Beit Alpha parthenocarpic cucumber**. The open-habit plants are vigorous, with small leaves. The fruits are **dark green** in colour, 16-18 cm long and weigh an average of approx. They have good firmness and an **excellent shelf life**. Ideal for greenhouse production.

GENETIC RESISTANCES

HR: CMV IR: PM/ZYMV

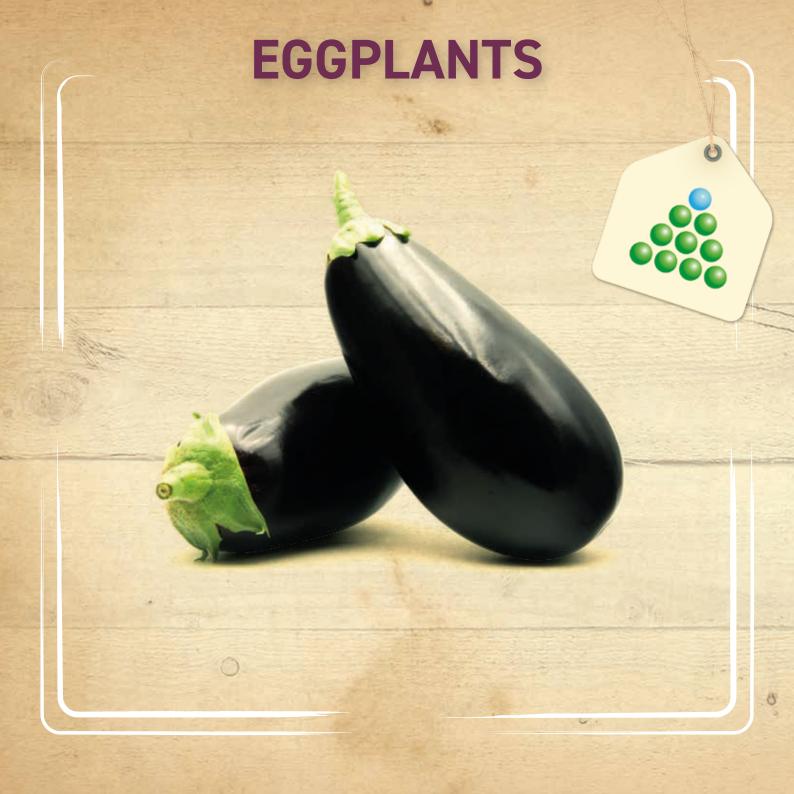

A **smooth** mini parthenocarpic cucumber variety, suitable for greenhouse and tunnel cultivation. The plants are open and compact, featuring very short internodes, with an **excellent generative capacity** and **high productivity**. For spring and summer growing cycles. The perfectly **cylindrical** fruits have a good **shelf life**, a length of 10-14 cm and a **shiny**, **attractive green colour**.

Top Seeds experts recommend transplanting between mid-February and mid-August.

GENETIC RESISTANCES

IR: PM

An eggplant variety with very **uniform round-oval** fruits, **shiny black** in colour. Hardy plants offering good coverage and average vigour, with short internodes. Very easy fruit setting even in unfavourable conditions, with a mid-early cycle and **high productivity**. Suitable for greenhouse, tunnel and open field cultivation. The variety has very good **firmness** and an excellent **shelf life**. The complete absence of thorns guarantees very good results even for industrial processing.

ROUND-OVAL

Eggplant variety with **medium vigour, round-oval** in shape, **uniform** and **black** in colour. The plants have a **good yield** with short internodes, and the fruits, weighing an average of 350 grams, have an excellent **shelf life**. Ideal for both greenhouse and open field cultivation.

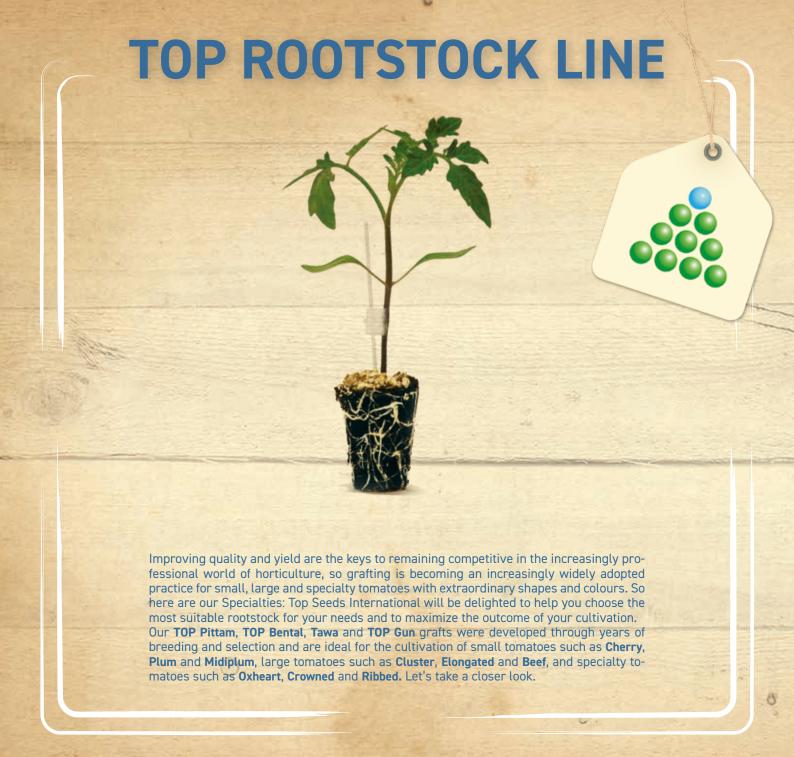

Mini watermelon variety consisting of medium-vigour plants with regular flowering and excellent fruit setting. Suitable for various growing cycles, the **flesh is red, compact and crunchy**, with a **high sugar content** and a limited number of small seeds. The fruits, weighing an average of 2-2.5 kg, are round, dark green in colour with mid/light green streaks. The peel is **thin but tough**, which makes the variety ideal for export, also favoured by the long shelf life. Excellent for greenhouse/tunnel and open field cultivation.

A new variety of **seedless mini** watermelon consisting of vigorous plants with **good fruit setting** and **resistance** to cold and high temperatures. The very **attractive** fruits have an average weight of 2-2.5 kg, are **crunchy** and **compact** and have a **high brix level**. In addition, the excellent **shelf life** makes them ideal for export.

Tawa VERSATILE EXTRA EARLY MATURING

Intraspecific rootstock developed for short cycles without affecting the organoleptic qualities of the fruits. It has **very high germinability and uniformity, medium-low vigour** and **high precocity.** It improves yield and increases dry matter production in short cycles. Its intraspecificity ensures a very high grafting affinity.
