PRODUCTIVE FIRM PULP

This very **tasty variety** is a premium product in the **midi plum-cherry tomato** segment. Plants have medium-high vigour and **short internodes.** The medium-sized fruits (approx. 30-35 grams) are arranged in a fishbone formation in regular and elegant clusters of 10-12 fruits with crunchy texture, excellent flavour and high brix level. The **thick stems** bear a large number of fruits, which have, good **firmness** and a **long shelf life.** 

## **GENETIC RESISTANCES**

**HR:** ToMV:0-2/Fol:0,1

IR: Mi/Ma/Mj

A premium variety of **midi plum tomato**. Plants have good vigour and **thick stems** bearing a large number of fruits weighing on average 35-45 grams. The fruits have good resistance to cracking, good **firmness** and a **long shelf life**. They have **good flavour** and a high lycopene content.

Top Seeds experts recommend transplanting all year round (in summer months, additional shade is needed to maintain good colouring).

## **GENETIC RESISTANCES**

HR: ToMV:0-2/Vd:0/Va:0/Fol:0,1

Mini-plum tomato with an intense red color and flavor. The clusters are very uniform and are composed by 14-16 fruits, regular and with a characteristic "date" shape with an average weight of 20-25 grams, they are supported by a robust stem and fleshy calix which confer the fruits a **longer LSF**. The plant, of high vigor, is recognized by the excellent production continuity during the long cultivation cycle, which gives a high yield.

## **GENETIC RESISTANCES**

HR: ToMV:0-2 IR: Mi/TYLCV

**Elongated tomato** consisting of a **medium-high vigour** plant with excellent fruit setting, elegant clusters of fruits arranged in a fishbone formation, a robust stem and **excellent cropping continuity** on the upper branches. The elongated shaped fruits have good **firmness** and average weight of approximately 130-150 grams, an **intense dark green colour** and high **tolerance to cracking** and blossom-end rot.

## **GENETIC RESISTANCES**

# DEFINED OF RED Arnon HIGH YIELD

A pepper variety consisting of vigorous plants with medium internodes. Suitable for **medium-early transplanting**, the variety adapts easily and offers **high production yields**. The G-GG caliber fruits are **uniform** and **well defined**, with good wall thickness, an excellent **green or red colour** and almost no streaks.

Top Seeds experts recommend transplanting in the first half of July.

## **GENETIC RESISTANCES**

HR: TM:0-3 IR: TSWV

A blocky red pepper variety with **bright red color**, high yeld and good wall thikness. The **higly productive** plant is vigorous and fruits are large and with a slightly flattened globe shape.

## **GENETIC RESISTANCES**

HR: TM:0-3 IR: TSWV

A pepper variety consisting of highly vigorous plants with medium internodes. The G-GG caliber fruits are **uniform**, with an attractive **yellow colour** and 4 well-defined lobes. Ideal for **late transplanting**, the variety has good **tolerance to cracking** and a **high yield**. Top Seeds experts recommend transplanting between 20 July and 5 August.

## **GENETIC RESISTANCES**

HR: TM:0-3 IR: TSWV

A sweet pepper with a **bright red** colour. Plants are vigorous with excellent resistance to the cold and to high temperatures too. With **excellent shelf life**, the fruits are **crunchy** and have an average weight of 100-150 grams, with a **regular** shape and size.

## **GENETIC RESISTANCES**

HR: TM2 IR: TSWV

A new variety of **Charleston pepper**, suitable for **winter** greenhouse **growing**, consisting of healthy, vigorous plants with a good range of resistance. The fruits are of excellent quality, with an **attractive green colour** and **no anthocyanins**.

## **GENETIC RESISTANCES**

HR: TM2

A variety of **Beit Alpha parthenocarpic cucumber**. The open-habit plants are vigorous, with small leaves. The fruits are **dark green** in colour, 16-18 cm long and weigh an average of approx. They have good firmness and an **excellent shelf life**. Ideal for greenhouse production.

## **GENETIC RESISTANCES**

HR: CMV IR: PM/ZYMV

A **smooth** mini parthenocarpic cucumber variety, suitable for greenhouse and tunnel cultivation. The plants are open and compact, featuring very short internodes, with an **excellent generative capacity** and **high productivity**. For spring and summer growing cycles. The perfectly **cylindrical** fruits have a good **shelf life**, a length of 10-14 cm and a **shiny**, attractive green colour.

Top Seeds experts recommend transplanting between mid-February and mid-August.

## **GENETIC RESISTANCES**

IR: PM

An eggplant variety with very **uniform round-oval** fruits, **shiny black** in colour. Hardy plants offering good coverage and average vigour, with short internodes. Very easy fruit setting even in unfavourable conditions, with a mid-early cycle and **high productivity**. Suitable for greenhouse, tunnel and open field cultivation. The variety has very good **firmness** and an excellent **shelf life**. The complete absence of thorns guarantees very good results even for industrial processing.

ROUND-OVAL

Eggplant variety with **medium vigour, round-oval** in shape, **uniform** and **black** in colour. The plants have a **good yield** with short internodes, and the fruits, weighing an average of 350 grams, have an excellent **shelf life**. Ideal for both greenhouse and open field cultivation.

Mini watermelon variety consisting of medium-vigour plants with regular flowering and excellent fruit setting. Suitable for various growing cycles, the **flesh is red, compact and crunchy**, with a **high sugar content** and a limited number of small seeds. The fruits, weighing an average of 2-2.5 kg, are round, dark green in colour with mid/light green streaks. The peel is **thin but tough**, which makes the variety ideal for export, also favoured by the long shelf life. Excellent for greenhouse/tunnel and open field cultivation.

A new variety of **seedless mini** watermelon consisting of vigorous plants with **good fruit setting** and **resistance** to cold and high temperatures. The very **attractive** fruits have an average weight of 2-2.5 kg, are **crunchy** and **compact** and have a **high brix level**. In addition, the excellent **shelf life** makes them ideal for export.

## Tawa VERSATILE EXTRA EARLY MATURING

Intraspecific rootstock developed for short cycles without affecting the organoleptic qualities of the fruits. It has **very high germinability and uniformity, medium-low vigour** and **high precocity.** It improves yield and increases dry matter production in short cycles. Its intraspecificity ensures a very high grafting affinity.
